## SUMMARY

As a passionate and dedicated Front End Developer, I am actively seeking opportunities to contribute my skills and expertise in a professional environment. With a strong academic foundation, including my graduation from the prestigious Vanderbilt Coding Bootcamp with an exceptional overall performance, I am well-equipped to tackle the challenges of the coding field. Committed to excellence and driven by a genuine enthusiasm for web development, I am eager to leverage my abilities and make a meaningful impact through innovative and user-focused solutions. My goal is to collaborate with a dynamic team, where I can continue to grow and contribute to the advancement of front end technologies, while delivering exceptional user experiences.

Full Stack Web Developer with a background in Psychology and life-long dedication to learning. Effective at combining creativity and problem solving to develop user-friendly applications. Known among staff for strong wit and attention to detail no matter the complexity of the project.

***Degree or Certification:*** *Vanderbilt University, Vanderbilt, TN*

## Letter of Reference

To whom it may concern,

If you are looking for a web developer who can create stunning and functional web applications, look no further than Liam Allen. He is a former student of mine in the Fullstack curriculum at Vanderbilt University, and he dazzled me with his talent and passion for web development. I had the privilege of instructing him for seven months, working with him during class time, tutoring sessions, and on major projects. He is a phenomenal candidate for any web development position.

Liam was a genius who mastered the core skills of web development in record time. He aced the core skills of HTML, CSS, Javascript, NodeJS, React, and other technologies. He also learned how to use AGILE methodologies, APIs, databases, and other tools to create dynamic and interactive web applications. He created three amazing web applications using various technologies and frameworks, demonstrating his ability to design and code stunning and functional web pages.

Liam was not only a brilliant and diligent learner, but also a leader and a mentor to his peers. He was always curious and inquisitive, asking relevant and insightful questions on the topic of the content. He was always generous and helpful, offering his peers his knowledge and assistance. During major activities, he was a powerhouse who could handle both frontend and backend development with ease and flair.

Liam was the #1 student in his cohort in terms of grades and feedback. He also wowed me with his soft skills, such as communication, problem-solving, and collaboration. He was always polite, respectful, and professional with everyone he interacted with. He had a positive attitude and a great sense of humor that made working with him a blast.

Liam was a rare gem who surpassed all expectations and inspired the class to be better developers. He showed great dedication and enthusiasm in learning new things and trying new challenges. He has the skills, the experience, and the personality to thrive in this field. He is a cut above the rest and deserves to be hired by any company that values excellence and innovation. I wholeheartedly recommend him for any opportunity that he pursues.

Sincerely, Justin Pyktel
